

Bugs in app.py:

<div>Previous</div> <div>Post method is missing</div> <div>@app.route('/', methods=["POST"])</div>	<div>After</div> <div>@app.route('/', methods=['GET', 'POST'])</div>
<div>Add condition statement to get net note in request form</div>	<div>if request.method == 'POST':</div>
<div>Change request.args.get to request.form</div> <div>note = request.args.get("note")</div>	<div>note = request.form['note']</div>

Bugs in home.html :

<div>• Title is missing</div>	<div>Its always a good habit to make understandable title</div>
<div><form action=""></div> <div>• Method and path is missing</div>	<div><form action="/" method="POST"></div>
